

Where the Conversion Leaks Are

voicenotes.com · CRO Recommendations · August 2026

The pricing page is the single most valuable conversion mechanism on this site, but it is bleeding value by presenting bare price points without plan names, feature comparisons, or billing frequency, forcing visitors to guess the value and actual cost.

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
